FINUG2016 workshop: Fundamental Investigation of Uranium Germanides and related compounds - 2016

Topic :

The FINUG 2016 workshop will gather the European researchers investigating uranium based germanides. It is open to chemists and physicists, experimentalists and theoreticians. The aim is to present the last results about the synthesis of new compounds, their crystallographic description, the characterization of their magnetic, electrical and thermal properties as well as the latest developments in understanding their complex behaviours, from experimental and theoretical points of view. The workshop is more widely open to any actinide or rare earth based compounds presenting strong electronic correlations, and to any advanced characterization technique in this research area.

This workshop will be based on review and regular talks, with a great opportunity for PhD students to present their results.

When:

From Sunday March 20th (lunch time) to Tuesday March 22nd (lunch time) 2016

Where:

Hotel "Les Balcons du Lac d'Annecy"*

<http://www.neaclub.com/les-balcons-du-lac-annecy-sevrier/>

**A shuttle service will be planned for the participants to the 46^{èmes} Journées des Actinides*

Important dates:

Pre-registration: from January 11th to 26th 2016

Abstract submission: February 26th 2016

Registration dead-line: February 26th 2016

Registration fees (all inclusive from Sunday to Tuesday lunches):

Single room: 250 € TTC**

Double room: 210 € TTC** for permanent staff - 170 € TTC** for students and post-docs

Daily participation (lunch included): 50 € TTC**

***Payments from CNRS accounts will benefit a VAT deduction.*
